Fuel Cells: Modeling, Control, and Applications
Bei Gou, Woon Ki Na, Bill Diong

Table of Contents

1. Introduction 1
2. Fundamentals of Fuel Cells 5
3. Linear and Nonlinear Models of Fuel Cell Dynamics 13
4. Linear and Nonlinear Control Designs for Fuel Cells 55
5. Simulink Implementation of Fuel Cell Models and Controllers 83
6. Applications of Fuel Cells in Vehicles 99
8. Control and Analysis of Hybrid Renewable Energy Systems 139

Appendix A Linear Control 193
Appendix B Nonlinear Control 199
Appendix C Induction Machine Modeling and Vector Control for Fuel Cell Vehicle Applications 207
Appendix D Coordinate Transformation 219
Appendix E Space Vector Pulsewidth Modulation 223
Index 229
